What the invention claimed is:

5

- 1. An electronic device comprising a plurality of air outlets in an outer shell thereof and an ozone $(O_3)/anion$ (H_3O_2) generating circuit adapted to generate ozone and anion and output generated ozone and anion through said air outlet after connection of the electronic device to power supply.
- 2. The electronic device as claimed in claim 1, which is an AC adapter.
- 3. The electronic device as claimed in claim 1, which is amobile telephone hand-free handset.
 - 4. The electronic device as claimed in claim 1, which is a mobile telephone battery charger for use in a motor vehicle.
